Quoting Service

Van Leeuwen Green creates, renovates, and maintains Landscapes across Melbourne's inner and eastern suburbs.

Initial Consultation - whether it be a garden renovation or landscaping project, the process begins with an initial consultation, for an upfront fee of $150 + GST.

What we provide

Horticultural expertise

Onsite visit from Hendrik Van Leeuwen the most experienced horticulturist within the business, **with 30+ years' experience** and the managing director of Van Leeuwen Green.

The purpose of this visit:

- To discuss and help you identify opportunities for improving and transforming your garden, along with **Hendrik's** knowledge and recommendations for the best way to approach the job, and who best to engage. Whether it be renovation/ restoration, landscape construction, a garden design from our experienced designers Hamish or Carolyn, or an arborist/ irrigation specialist.

- To filter ideas and discuss your wishes.

- Allowing us to examine the site and work to achieve the best outcome for your garden.

Following the site visit

You will receive via email, a complete itemised/ detailed quote.

Communication and Support

Constant communication within the process of agreeance of the quote and any alterations applicable.

All Van Leeuwen Green staff, from Hendrik the director, Jody the Business Manager through to our team leaders, all have a strong focus on customer support.

- Our aim is to make sure that you are completely satisfied with each step of the process.

Final stages

Once the quote has been accepted and the job has been completed, you will receive a full credit back of the $165 inclusive of GST outlined on the final invoice.

We will also provide our ongoing garden maintenance recommendation to keep on top of the new renovation/ landscape works completed and to continue to professionally maintain your garden.

Garden renovation

plants, gardens, landscapes

Van Leeuwen Green specialises in garden renovation and restoration. Not everyone wants or needs major landscape construction to create a beautiful garden. A better option for many people is transforming their front or back yards through new plants and planting.

est 1995

Van Leeuwen Green renovates and refreshes gardens by carefully assessing the existing vegetation at your home, working with you to decide what plants should be removed or managed differently eg. by more regular pruning. The next step is to select species that will either complement your existing garden or establish a new look or theme altogether.

The skills and knowledge that Van Leeuwen Green brings to garden renovation are based on careful plant selection. This involves choosing species that have the right aesthetic and functional qualities as well as plants that are robust and reliable. As the plants and planting specialists we only recommend species or cultivars that are grown by the best nurseries. We ensure that plants are available, grown in the right sized container appropriate for your garden and then planted correctly and at the right time of year.

Any garden renovation we do is based on a vision for how the plants will knit the garden together, making it more usable and attractive. We work with you on the spot to determine exactly what you have in mind and can show you garden transformations achieved over many years. For larger projects or complex plantings we recommend our design service.

Van Leeuwen Green also restores historic or heritage gardens. These gardens often require detailed restoration plans and we work with heritage consultants and designers to bring these gardens back to their original state.
